Property Owners Successful in Pushing Back Proposed SSA Tax

The Village of Cherry Valley has determined that the property owners within the Village's Special Service Area (SSA) have collected the required number of signatures from residential and commercial property owners to prevent the project and related tax levy from proceeding.

For the past three weeks, the Village has been reviewing the petitions which were submitted on behalf of the property owners.

While the Village has, from the beginning, stated its preference to find alternative funding sources to pay for the improvements, the successful petition drive insures that the Village of Cherry Valley cannot proceed for (2) years on establishing this Special Service Area or extending a tax for this exact proposed Special Service Area.

Because of the importance of the project, the Village will continue its efforts to identify and pursue whatever options are available in an attempt to fund and complete the badly needed repairs.
